Hard Work Never Fails

As mentor is someone who sees more talent and ability within you, than you see in yourself, and helps bring it out of you, so I guide labkarts team to achieve their road map of contributing in new energy and technology

The path from dreams to success does exist, may you have the vision to find it, the courage to get on to it, and the perseverance to follow it, wishing you a great journey.

S.Premkumar
Co-Founder & Mentor
LABKARTS

We always with your every step

Whether it is the Developers who design your instruments or the Marketing Managers who sell them, all our employees will have gained valuable experience within academic or industrial R&D circles – and often,

both. It is this experience that helps us understand the importance of measurement instruments to the scientific community.

We have invested heavily in people to develop and support a range of powerful, high-end, high-precision, measurement systems covering both hardware and software – modular solutions designed to give you the best user experience possible, simplify your workflow, reduce your project lead time and drive your research forward.

The CEO's Foreword

When I formed Labkarts as an Engineer in 2017, and lead the company forward as Chief Executive Officer. We started up as a small start-up, created in 2017, specializing in Electrochemical measurement systems for varies applications. So how did we find ourselves, 5+ years later as a company managing a product portfolio diverse enough to cover electrochemistry, material testing, Lithium-ion battery fabrication equipment's, Fuel cell & Solar cell system and Environment chamber like Dry Room & Glovebox?

The answer to these questions, and the sustained growth of Labkarts, in my mind, primarily relates to human qualities. For, since the company's creation, we have always recruited scientists and other employees who are both curious and who care genuinely about the customer journey. Generally, Labkarts employees have gained experience in public research or industrial environments. They have experienced first-hand, the difficulties that our clients face every day. Consequently, this leads to a drive to develop longstanding professional relationships with our partners; to better understand the problems they encounter in their research or R&D projects and develop solutions which both make their lives easier and help to break down scientific boundaries.

Labkarts prides itself in the quality and reliability of the products it designs and develops. But this is only really half the story. Because the relationships we develop with our customers once the product has been shipped from our factory are every bit as important as ground breaking product specifications, academic citations and company reputation.

Take your time to browse this site, and please do not hesitate to contact us if you have any questions about our products, or if you wish to talk to us about a project you are currently working on, or if you just want to make some suggestions.

P.Dineshkumar
CEO of LABKARTS

Join the team!

Are you passionate about science and technology? Would you like to develop your skill-set as part of a dynamic, highly-driven but friendly environment within a truly international company? If so, contact us!

LABKARTS is always keen to hear from individuals who can bring something new, something different to its teams. If you think you can make a difference, please send us your CV with a covering letter.

Please take the time to browse the following positions and contact us via the online form below if you are interested in finding out more about LABKARTS.

Other changes

- Bottom of the home page we looking for slide image & Video from gallery
- Header format as we mentioned on whatsapp group same design
- Header with projects page
- Header with News page
- Remove quality service page from Header
- Product sub-page like Electrochemical Analyzer & Accessories, Glove box & control environmental equipment's, BET, battery fabrication line, battery material & Accessories each sub-page have their own sub-product page
- Connect information and GST need to update
- Search bar for products
- Download catalogue option in all pages
- Social media follow up link
- Product page reference ([Products - Biologic](#))
- Support page (service call booking through online, Application notes, software download link, video tutorial)
